

Ask about
PrEP

**Ask your doctor about
a daily pill that can protect
you and your partners.**

SAN FRANCISCO DEPARTMENT OF PUBLIC HEALTH

Ask about PrEP

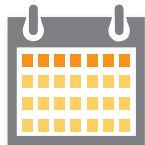

Take 1 pill once a day.
Finding a routine is
essential.

PrEP is safe and can
reduce your risk of
HIV by more than 90%.

Get tested for
HIV and STDs
every 3 months.

It takes at least 1 week
on PrEP before you'll be
protected for anal sex, and
3 weeks for vaginal sex.

Tell your provider
if you plan to stop
(or restart) PrEP.
